

Confluence Default Theme

Relates To

THEME PRESS

Confluence Default Theme

Prompt

High-level setting in Confluence, which determines the overall look and feel for all site spaces.

Definition

The word [theme](#) is used by Atlassian to define a theming add-on, like Theme Press. [Out-of-the-box Confluence](#) installs with a default for this setting, which BrikIt refers to as the **Confluence Default Theme**. This setting controls the presentation of all spaces across the site, and [can be changed](#) in the **General Configuration** area of **Confluence Administration**.

Info

Confluence Default Theme vs. Theme Press Theme

The word "theme" is used by Atlassian to define a theming add-on, like Theme Press. BrikIt uses the word "theme" to define an overall branded design created with the Theme Designer, and deployed within the Theme Press environment.

If you would like Theme Press to apply to all spaces in your site, [select BrikIt Theme Press](#) as your [Confluence Default Theme](#).
