# **Instant Page Cache Cleaner**

## Instant Page Cache Cleaner

 $\begin{array}{c} \textbf{Prompt} \\ \textbf{An automatic process that regularly empties the Instant Page Cache.} \end{array}$ 

#### **Definition**

The Cache Cleaner is an automatic process that runs every ten minutes (by default) and empties the Instant Page Cache entries. This allows feeds (such as recently updated pages) and other dynamic content to update periodically.

The timing of this job is configurable, or it can be triggered manually.
