Folksonomy Page

Prompt

The Targeted Search version 2.0+ interface for managing folksonomy labels.

Definition

With Targeted Search version 2.0 and greater, we introduced an administrative interface for tracking and managing [folksonomy](#) labels.

On this page, you will see a list of all the folksonomy labels being used across the site, and for each term a link to a list of all the pages on which it is applied. You can also [promote folksonomy terms](#) into the [taxonomy](#), where it will be tracked and managed on [the Search Filters page](#).

The Folksonomy page also has a tool called the "Replace Any Label" tool, which allows you to [swap one label for another](#) on any content in which you have edit permission.

Only users with [Confluence administrator permissions](#) can access this page.

There are two ways to get to this page:

1. Navigate via [Confluence Administration menu](#):

Gear icon  in the [Confluence header](#) **General Configuration** **Folksonomy** link, under BrikIt Targeted Search in sidebar.

2. Direct URL:

<your [Confluence base URL](#)>/plugins/targetedsearch/settings/folksonomy.action
