CONTENT FLOW

Review Label

Prompt

Pages under review can be automatically labeled to help track work.

Definition

This is an optional label that will be automatically applied to pages under review according to [the Review Policy](#) for that space. When any page in the space enters the review period, the label is applied to those pages.

Note that removing the Review Label will not remove previously applied review labels to pages already in the review period.

Info

The Review Label is not applied immediately upon entering a new review label. Rather, it will be added to all pages meeting the review policy following the next overnight job run.
